MARCH 2018 | SUNTEC SINGAPORE

Centrifugal Compressors 101: Part 1

Mark J. Kuzdzal

Director Business Development Supersonic Compression
Program
Dresser-Rand, A Siemens Business

Jay Koch

Product Line Management Single Shaft Compressors
Dresser-Rand, A Siemens Business

DISCLAIMER

The information contained in this short course, including concepts, factual data, technical interpretations, and opinions, which while believed to be accurate, are offered solely for informational purposes. No representation, guarantee or warranty is made concerning the accuracy of such data, interpretations, and opinions.

Dresser-Rand, Mark J. Kuzdzal and Jay Koch hereby disclaim any liability in connection with the use of this information by others.

Agenda

- Reciprocating and centrifugal compressor similarities/ differences
- How do they work? (Potential Energy, Kinetic Energy, PE, KE, ...)
- History of compressors
 - Timeline, major advances
 - Configurations, straight-through, back-to-back, compound, side streams, double-flow
- Markets served
- Pressure containment
 - Case
 - Nozzles and flanges

Mark

Agenda Continued

- Selection Process
 - Aerodynamic Selection
 - Mechanical Design
 - Rotordynamic Design
- Impellers
 - Design Basics
- Stationary Aero Components
 - Inlet, inlet guide
 - Diffuser, vaned and vaneless, LSD
 - Volute and collector
 - Return bend / Return channel
- Compressor Performance
 - Nomenclature
 - Impact of Operating Conditions
 - Internal Leakage
 - Surge Control

Jay

Agenda Continued

- Rotordynamics
 - Critical speed maps
 - Synchronous unbalance response
 - Stability, log decrement
 - Damper seals
 - Bearings, seals
 - TP, Sleeve, magnetic
 - Squeeze film damper
 - Steady state and transient torsional
- Stress analysis
 - Impeller dynamics
- Acoustics
- Seals
 - Gas seals
 - Oil film seals
 - Laby

Mark

Agenda Continued

- Testing
 - Type 2 and Type 1, Performance testing
 - Mechanical testing
- Vibration signatures of classic problems
 - Rotor Instability
 - Surge and stall - forced vibration
- Materials considerations
 - NACE
 - Typical compressor materials
 - Effects of blockage and fouling
- Adjourn

Jay

Who Are We???

- **Mark J. Kuzdzal**
- **1988 Graduate of University of Buffalo (BSME)**
- **Joined Dresser-Rand in 1988**
- **Texas A&M Advisory Committee Member Since 2004**
- **Penn State Advisory Committee Member Since 2004**
- **RotorDynamics group, NPD team, Datum Development Team, Development Manager, Core Tech. Manager, Business Development Director.**
- **Current Responsibilities include:**
 - **Supersonic compressor product line definition and commercialization.**
 - **Favorite work-related topics: aero-mechanical excitation (SSV), & Acoustics**

Who Are We???

- **Jay Koch**
- **Graduate of Iowa State University (BS Aerospace Eng.)**
- **Joined Dresser-Rand in 1991**
- **Worked for Allied Signal Aerospace before joining D-R**
- **Aero Dynamics group, NPD team, Datum Development Team, Manager Aero/Thermo Design Engineering, R & D Manager, Principal Engineering Lead , Product Line Management Single Shaft Compressors**
- **Responsibilities include:**
 - **Design, development, and analysis of all aero dynamic components of centrifugal compressors**
 - **Development of software used to select and predict compressor performance.**
 - **Improved aero dynamics efficiency and range.**
 - **New Product Development**
